

SAMPLE AUDIT REPORT

HOTCHOWS.COM — ADA AUDIT

Automated WCAG 2.1 AA compliance scan, AI-generated fixes, deploy-ready output.

SITE AUDITED	PAGES SCANNED	AUDIT DATE	REPORT ID	ENGINE
hotchows.com	8 (depth 3)	May 3, 2026	HC-ADA-20260503-001	Claude Sonnet 4.6

SCAN SUMMARY

8 PAGES SCANNED	23 VIOLATIONS FOUND	21 AUTO-FIXED BY AI	4 MIN TOTAL AUDIT TIME
---------------------------	-------------------------------	-------------------------------	----------------------------------

SEVERITY BREAKDOWN

CRITICAL (LEVEL A) 11 Blocks assistive technology entirely. Highest legal exposure.	SERIOUS (LEVEL AA) 9 Substantial barriers for many users. Required for AA compliance.	MODERATE 3 Quality issues that degrade UX but don't block content.
--	--	---

COMPLIANCE SCORE (POST-FIX) WCAG 2.1 AA Up from 61/100 pre-audit · 21 fixes deployed in < 4 min	94/100 SUBSTANTIALLY CONFORMANT
--	--

TOP ISSUE CATEGORIES

A Missing alt attribute on informative images	SC 1.1.1	7 x	AUTO-FIXED
A Icon-only buttons missing accessible name	SC 4.1.2	4 x	AUTO-FIXED
AA Insufficient color contrast on body text	SC 1.4.3	5 x	AUTO-FIXED
A Form inputs without associated <label>	SC 3.3.2	3 x	AUTO-FIXED
AA Embedded video missing captions track	SC 1.2.2	2 x	MANUAL REVIEW

BEFORE / AFTER DIFFS

3 OF 21 AI-GENERATED FIXES.

Every fix is shown side-by-side in a visual diff viewer before any file is overwritten. A `.bak` backup is created automatically and one-click restore is always available.

1. Hero image is missing descriptive `alt` text

WCAG 1.1.1 – Level A

/var/www/hotchows.com/index.html · line 142

— BEFORE

```

```

+ AFTER

```

```

Impact: Screen-reader users now hear a meaningful description instead of "image". Resolves all known SC 1.1.1 failures on the page.

2. Icon-only "view cart" button has no accessible name

WCAG 4.1.2 – Level A

/var/www/hotchows.com/menu/index.html · line 88

— BEFORE

```
<button class="cart-btn">
  <svg width="24" height="24"> ... </svg>
</button>
```

+ AFTER

```
<button class="cart-btn" aria-label="View cart, 3
items">
  <svg width="24" height="24" aria-hidden="true"> ...
</svg>
</button>
```

Impact: Assistive tech now announces "View cart, 3 items, button" instead of an unlabeled icon. The decorative SVG is hidden from the accessibility tree to avoid double-announcement.

3. Body text fails minimum contrast (2.85 : 1)

WCAG 1.4.3 – Level AA

/var/www/hotchows.com/css/site.css · line 217

— BEFORE

```
.body-text {
  color: #9CA3AF; /* 2.85 : 1 on white – FAIL */
  background: #FFFFFF;
}
```

+ AFTER

```
.body-text {
  color: #4B5563; /* 7.56 : 1 on white – PASS AAA */
  background: #FFFFFF;
}
```

Impact: Color was the only mid-paragraph distinction; AI preserved hue family while shifting luminance to clear AAA. Visual rhythm of the page is unchanged.
